

Michelle Horn

Senior Frontend Developer

Florianópolis, Brazil | michellehorn@live.com | +55 (48) 99661-4422

Summary

I'm a frontend developer with 8+ years of experience building robust, user-friendly applications using React.js, Next.js, Vue.js, TypeScript, and GraphQL. I've contributed to products in the e-commerce, edtech, and B2B sectors, collaborating in agile teams to deliver scalable solutions. I enjoy crafting great UI, improving developer experience (DX), and aligning with product goals.

I have beginner-level experience with backend development using Node.js, C#, and Elixir, and I'm continuously improving in this area. I'm also comfortable using AI tools for developers such as GitHub Copilot and ChatGPT to boost productivity and code quality.

Highlights

- Currently studying React Native, covering topics like:
 - Core concepts (components, state, props)
 - Building complete apps with navigation and authentication
 - UI development based on Figma designs
 - API integration, local storage, push notifications
 - Using Expo and best practices for React Native development
 - Backend integration using Node.js and databases
- Mentored junior developers and taught workshops at Trybe.
- Created onboarding guides and learning materials to support team growth.
- Contributed to the creation and evolution of internal design systems.

Key Skills

- Frontend: React.js, Next.js, Vue.js, TypeScript, Angular 2+, Redux, GraphQL, REST APIs
- Backend (Beginner): Node.js, C#, Elixir
- UI/UX: Accessibility, Responsive Design, UI Design Principles
- Testing: Jest, React Testing Library, Cypress
- Developer Experience: Agile/Scrum, DevOps collaboration, CI/CD pipelines
- Domains: E-commerce, Edtech, HR, B2B tech

Professional Experience

Senior Frontend Developer, Leaflink (Remote) | Apr 2024 – Mar 2025

- Contributed to the development of a B2B e-commerce platform for cannabis distribution.
- Built performant and scalable features using Vue.js and Vite.
- Improved test reliability with Jest and Cypress.

Frontend Engineer, Grupo Boticrio (Remote) | Jul 2023 – Apr 2024

- Worked on a large-scale e-commerce platform for beauty and cosmetics.
- Developed React.js components, integrated GraphQL APIs, and managed state with Redux.
- Participated in sprint planning and technical architecture discussions.

Senior Frontend Developer, Mouts (Remote) | Nov 2022 – Jan 2024

- Built internal HR tools for Ambev to support employee performance and tracking.
- Used Next.js, React.js, and Tailwind CSS to create responsive interfaces.
- Collaborated with product and UX teams from concept to production.

Senior Front-End Engineer, Raro Labs (Remote) | Jan 2022 – Jan 2023

- Worked on various projects in HR, education, and retail.
- Used Vue.js and React.js to build scalable UI components with GraphQL integration.

Software Developer, Trybe (Remote) | Aug 2020 – Dec 2021

- Helped develop Trybes edtech platform using React.js, GraphQL, and Redux.
- Contributed to shared component libraries and frontend best practices.
- Mentored junior developers, taught workshops, and created educational materials.

Frontend Developer, Codenation | Sep 2019 – Aug 2020**Frontend Developer, NOALVO | Dec 2018 – Mar 2019****Frontend Developer, UP Negcios | Jun 2018 – Dec 2018****Fullstack Developer, Har Tecnologia | Feb 2018 – Jun 2018****Intern Developer, Har Tecnologia | Sep 2017 – Feb 2018****Education**

Bachelor in Systems Analysis and Development
Florianópolis, Brazil - 2016
